

Intelligent Supply Chain Operations Platform

real-time operational layer that connects **procurement, inventory, production, logistics and machine telemetry, detects risks** before they become disruptions, recommends actions, and coordinates execution across the supply chain.

Personas

Chief Supply Chain Officer

Supply Chain Manager

Procurement Manager

Production Planner

Plant Manager

Warehouse Manager

Logistics Manager

Operations Analyst

CFO

CIO/CTO

Supplier

Objective 1 — Reduce operational disruption

Objective 2 — Improve inventory efficiency

Objective 3 — Improve planner productivity

Objective 4 — Build trusted decision intelligence

Competitive categories

A. Supply-chain orchestration- Kinaxis Maestro

B. Enterprise planning- o9 Digital Brain

C. End-to-end supply-chain platform- Blue Yonder

D. ERP-native ecosystems-SAP,Oracle,Microsoft Dynamics

E. Manufacturing platforms-Siemens,Rockwell,PTC,Dassault Systèmes

Differentiator #1 — Operational decision layer

Differentiator #2 — Machine + supply chain correlation

Differentiator #3 — Actionable AI

Procurement

- System imports open POs.
- Each PO has expected delivery date.
- System calculates risk.
- Risk is visible on dashboard.
- User can drill into risk drivers.
- User can create an escalation workflow.

Inventory- MVP

- real-time stock
- available inventory
- reserved inventory
- safety stock
- inventory aging
- stockout alerts

Production- MVP

- production orders
- planned vs actual
- machine status
- downtime
- material availability
- production bottlenecks

Logistics- MVP

- shipment tracking
- ETA
- carrier status
- delayed shipments
- inbound/outbound visibility

Analytics / Decision Support

This is the heart of the platform.

Procurement

Analyze demand → develop sourcing strategy → find suppliers → issue RFQ/RFP → evaluate bids → negotiate → contract → manage supplier → measure performance → manage risk → analyze spend → improve/sustain the relationship.

Procurement is the systematic process of **identifying, sourcing, evaluating, purchasing, and managing goods, services, or works from external suppliers** to meet an organization's requirements at the **right quality, quantity, price, time, and terms**.

Procurement is the process of obtaining the goods and services an organization needs from external sources in the most effective and economical way.

purpose of procurement is to ensure that an organization obtains the **right goods, services, or works from the right source, at the right quality, quantity, price, time, and conditions**, while minimizing risk and maximizing organizational value.

Objective 7 Rights of Procurement

1. Right Quality

2. Right Quantity

3. Right Price

4. Right Time

5. Right Source

6. Right Place

7. Right Terms

- **Reduce total cost of ownership (TCO)**
- **Improve supplier performance**
- **Build strategic supplier relationships**
- **Reduce supply-chain risk**
- **Improve quality**
- **Increase operational efficiency**
- **Encourage innovation**
- **Ensure regulatory and contractual compliance**
- **Promote ethical sourcing**
- **Support sustainability and ESG goals**
- **Improve transparency and accountability**
- **Create long-term business value**

Profitability → Innovation → Sustainability → Competitive advantage
